Zipaquirá

PROFESSIONAL PROFILE

Multimedia Engineer with hands-on experience in web development, 3D modeling, and digital design, specialized in building end-to-end multimedia solutions that blend creativity with technical precision. Proven track record delivering complete digital projects — from concept to launch — including corporate websites, e-commerce platforms, brand identities, and AI-powered automation. Results-driven professional with the ability to lead projects independently and adapt quickly to emerging technologies.

PROFESSIONAL EXPERIENCE

Digital Development and 3D Modeling Specialist

CDMAFE

May 2024 – Present

- Comprehensive development of corporate digital presence, including design and programming of corporate website
- Creation of complete brand manual and digital marketing strategies
- Professional 3D modeling of corporate mascot, strengthening brand visual identity
- Specialized design for CNC cutting, optimizing physical production processes
- Coordination of digital and physical elements aligned with commercial objectives

Full-Stack Developer & AI Integrator

P&J Abogados

Dic 2025 – Feb 2026

- **Landing Page Development:** Designed and developed two high-conversion landing pages featuring data-capture forms and a custom administrative panel for database management.
- **AI Conversational Bot:** Developed a WhatsApp bot using PHP, integrated with AI parameters to provide human-like conversational experiences.
- **Backend Systems:** Built a dedicated administrative dashboard to manage, store, and process user data collected through automated channels.

Freelance Web Developer

Independent Projects

2023 – Present

- Website development for Puerta del Cielo Church
- Creation of multiple e-commerce projects
- Web application development with modern frameworks
- User experience optimization and responsive design
